

Hospital Performance: Surgical Site Infections (SSI)

Performance Measure	CY2011	CY2012	CY2013	Difference (CY2011 vs CY2012)
All SSIs	186	161	129	Improvement (30.65% reduction)
All Procedures	22380	22845	23485	
All SSIs SIR	1.06	0.9	0.7	Improvement
CABG Infections	29	19	34	Decline (17.24% Increase)
CABG Procedures	2813	2478	2590	
CABG SIR	0.87	0.68	1.12	Decline
HPRO Infections	67	63	45	Improvement (32.84% reduction)
HPRO Procedures	7290	7862	8034	
HPRO SIR	1.02	0.89	0.66	Improvement
KPRO infections	90	79	50	Improvement (44.44% reduction)
KPRO Procedures	12277	12505	12861	
KPRO SIR	1.16	0.99	0.61	Improvement

* The Standardized Infection Ratio (SIR) is a summary measure used to compare the infection rate of one group of patients to that of a standard population.
